

## LOW PROFILE T45-95E-1025

Low profiled sheets are designed for commercial and industrial buildings' facades and internal linings. Easy and fast to assemble, low profiled sheets are a perfect choice when both speed of construction and functionality are key.

Steel	0.6	5.74	Polyester
Steel	0.6	5.74	GreenCoat Hiarc
Steel	0.7	6.70	Galvanized

# COLOURS & COATINGS

## GALVANIZED

Metal coating improves the corrosion resistance of steel and extends product lifetime. Zinc-coated steel sheets are suitable for applications where corrosion resistance is required. The corrosion resistance provided by the zinc coating is in direct proportion to the thickness of the zinc layer.

## POLYESTER

Polyester for outdoor use is an economic coating for wall profiles in warehouses and other buildings. It is recommended for the construction industry. It is suitable for applications where coating is not used under extreme conditions, nor is there high requirement of long-term use. This coating offers a wide colour selection and budget price.

## HIARC

Hirac is recommended for the construction industry. It has supreme colour and gloss durability, and metallic colours are available. The Hirac colour coating has been developed especially for facades. It has excellent resistance to corrosion, excellent resistance to UV radiation and it is easily kept clean.
